

Data Access Tools and Data Releases

A brief description

Matias Carrasco Kind @ NCSA/UIUC

DES Meeting @ Cambridge, December 15th

Outline

- Introduction
- DESDM
- DES Science Portal
- NOAO Data Lab
- easyaccess
- DESDM stats
- DES Labs
- JupyterHub + DESDM
- DES Github
- DES cutout services
- Integrated tools vision
- DR1 Release
- Conclusions

Introduction

- DES Survey: Gold (Data) Mine
- DESDM: Excellent job at mining the data
- DES: Consumer outside the mine
- Need to bring gold (data) outside
- Tools and interfaces
- Y3A1 is out!

DESDM @ NCSA

The Core DESDM Team at NCSA

- Donald Petravick, *Senior Project Manager and Principal Investigator*. [email](#)
- Matias Carrasco Kind, *Research Scientist*. [email](#) [www](#)
- Gregory Daues, *Research Programmer*. [email](#)
- Douglas Friedel, *Research Programmer*. [email](#)
- Margaret Gelman, *Research Scientist*. [email](#)
- Michelle Gower, *Senior Research Programmer*. [email](#)
- Robert Gruendl, *Research Scientist and Associate Research Professor of Astronomy*. [email](#)
- Michael Johnson, *Research Scientist*. [email](#)
- J.D. Maloney, *Storage Engineer*. [email](#)
- Felipe Menanteau, *Research Scientist and Associate Research Professor of Astronomy*. [email](#) [www](#)
- Eric Morganson, *Research Scientist*. [email](#)
- Francisco Paz-Chinchon, *Postdoctoral Reserach Associate*. [email](#)
- Christopher Pond, *Senior Database Administrator*. [email](#)

Data Management and operations for DES and LSST

What do we do?

- Process raw data nightly (Firstcut)
- SN, transients, Alerts (SNPipeline)
- Process and calibrate raw data (Finalcut)
- Coadd Single Epoch images (MultiEpoch)
- Serve data: Archive and catalogs (DB)
- Other services: Confluence, EUPS, Interfaces, **Tools**, etc.
- Many others...

DES Science Portal

desportal.cosmology.illinois.edu

- @ NCSA but managed by LineA
- Interactive Coadd Image exploration
- Moving some services from old-portal to the Science portal
- Already with Y3A1 data

NOAO Data Lab

datalab.noao.edu

- Also a VM @ NCSA but managed by NOAO
- New initiative and release partner for DR1
- Mutual benefits
- Will keep data private until release

easyaccess

DARK ENERGY SURVEY
DATA MANAGEMENT

easyaccess 1.3.1. The DESDM Database shell.
* Type 'help' or '?' to list commands. *

DESDB ~> █

Motivations

- DES DB in Oracle
- Needed upgrade from older versions (trivialaccess)
- Enhanced SQL command line interpreter
- Astronomically friendly
- Python API, web interface
- There are many other clients but needed one standard for beginners

Some cool features 😊

- History of commands
- Smart TAB auto-completion of commands, columns, users, tables and path
- Very flexible configuration
- Completely open source and written in python
- Write tables in csv, tab, fits and hdf5 formats
- Load sql queries directly from a file
- Load table directly in to DB in one step, no memory issues
- Can be imported as python module (py2/py3)
- Tables are handled and displayed using pandas
- Can run python functions inside query (beta)
- Many more...

Installation

Making things even easier

- Clone it from [github](#)
- Using pip or easy_install
- Using EUPS @ DESDM
- Pre-installed in Docker Image (and run outside the container)
- **New!** Install with [conda](#)

```
conda install easyaccess -c mgckind
```

Future and Demo

- Generalization (SQLAlchemy), in-query python functions, batch jobs, checkpoint, web, better Jupyter integration, more...
- easyaccess: Enhanced SQL interpreter for astronomical surveys (Carrasco Kind+, 2016?)
- For a more detailed tutorial check [Here](#)

Live Demo!

Some DESDM statistics

(Scroll down ↓)

DESDM New accounts

More than 250
New users since
new On-
boarding!

New DES
Member? Check
[Here](#)

Several Services:
DB, Confluence,
HipChat,

BitBucket, Stackoverflow

DB Users

Triple the number of users since easyaccess

Almost 200 ea users with different activity levels

Feedback via [github issues](#), stack-overflow-like questions, email list

and personal inquiries

DB Quotas

Personal space actively used and constantly increasing

People create and share tables with one command

~ 4.5 TB in personal space, tables and index tables included

Experimental UI projects being developed (Openstack + Docker)

DES Labs

Easyaccess web

Jupyterhub +
easyaccess

Des maps

Footprint

DES cutouts

Map exploration

Easyaccess online

Science Server

deslabs.ncsa.illinois.edu

JupyterHub + easyaccess + JS9

 jupyter +  Dark Energy Survey

- Multi-user jupyter notebook sessions
- Access with DB credentials
- Running in OpenStack ("The Cloud")
- Easy setup (Running from Docker container)
- Easyaccess and other tools installed
- Spark Cluster in alpha stage
- Local JS9 (Next gen. DS9) integration
- Still in beta mode, planning to scale up
- Open to DES collaborators

Github Org

<https://github.com/DarkEnergySurvey>

The screenshot shows the GitHub organization page for the Dark Energy Survey. At the top, the organization's name "Dark Energy Survey" is displayed with the subtitle "Data Management". Below this, the location "NCSA, University of Illinois, Urbana IL" and the website "http://www.darkenergysurvey.org" are listed. The main navigation bar includes "Repositories", "People 20", "Teams 4", and "Settings". A search bar with the placeholder "Find a repository..." and a "New repository" button are also present. The repository list on the left includes "pipebox" (Python, 0 stars, 0 forks, updated a day ago), "desdm-dash" (Python, 0 stars, 0 forks, updated 14 days ago), and "data_access_examples" (Jupyter Notebook, 0 stars, 2 forks, updated on Sep 1). On the right, the "People" section shows a grid of 12 profile pictures and an "Invite someone" button.

Ask me for invite!

Online Cutout Services

descut.cosmology.illinois.edu

- Cutout Services for both: Coadd images and Single Epoch
- Nice REST API so can be also accessed from e.g. *python*
- Almost production-like services with GPFS mounted

Live demo!

Data Release 1

- A release is not only data! but interfaces, software, archive, documentation, support and commitment
- Each component is not a single unit, e.g. Documentation is not only a paper release but also tutorials, data model, DB, software, etc...
- Content, validation and vetting done with collaboration
- Many factors/people involved, long term plan
- Internal and public release, DES DR1 **December 15th, 2017**

Public DR1 Plan @ DES-docdb 9410

Conclusions

- Tools being developed to make data access easier @ LIneA, NOAO and DESDM
- Easyaccess, Cutouts, Jupyter, Js9, Science Portal, etc...
- Opensource and integrated software
- Bring software to the data!
- Want to help? Want some infrastructure? Let me know!

Thanks!
